Contents

1. Introduction

2. Requirements

3. Downloading & Installation

4. How to use the plugin?

1. Introduction

"Mass Users Password Reset Pro" plugin gives you option for resetting the password of users by various ways and an email notification containing new password will be send to users.

2. Requirements

A) WordPress 4.4 or higher.

B) If you have download/install free version of this plugin then kindly delete it.

<u>Delete via admin panel</u>

Go to plugins, search for 'Mass Users Password Reset' then deactivate and delete it.

<u>Delete via FTP</u>

Go to wp-content/plugins directory. Search for 'Mass Users Password Reset' folder and delete it

3. Downloading & Installation

<u>Upload via WordPress Admin Panel</u>

1. Log into WordPress and Plugins page

2. Select the .zip file you downloaded and click Install

3. Enter your FTP information if required and install the plugin

4. Activate the plugin

<u>Upload via FTP</u>

1. Unzip the .zip file you downloaded.

2. Upload the "Mass Users Password Reset Pro" plugin folder to your wp-content/plugins
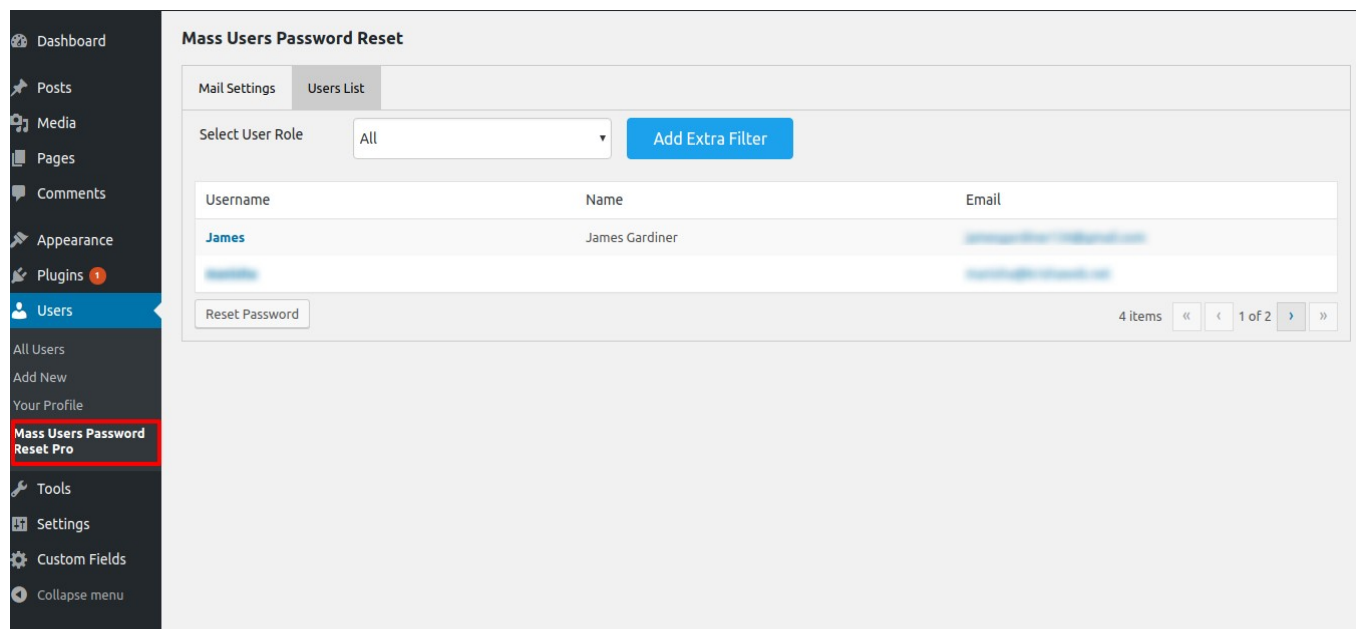

directory.

3. Navigate to your Admin Panel: Plugins.

4. Under "Mass Users Password Reset Pro", click Activate.
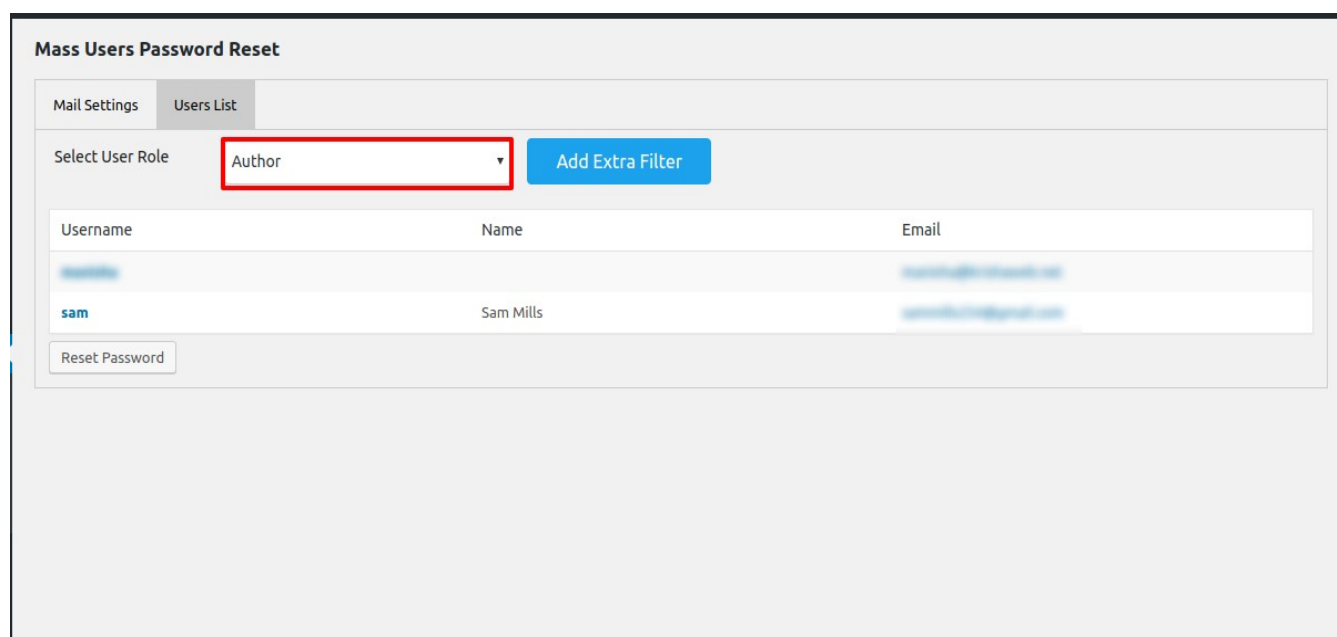

4. How to use the plugin?

Once you have installed the plugin, you have to visit **Users >> Mass Users Password Reset**

Pro to use it.

All users password reset
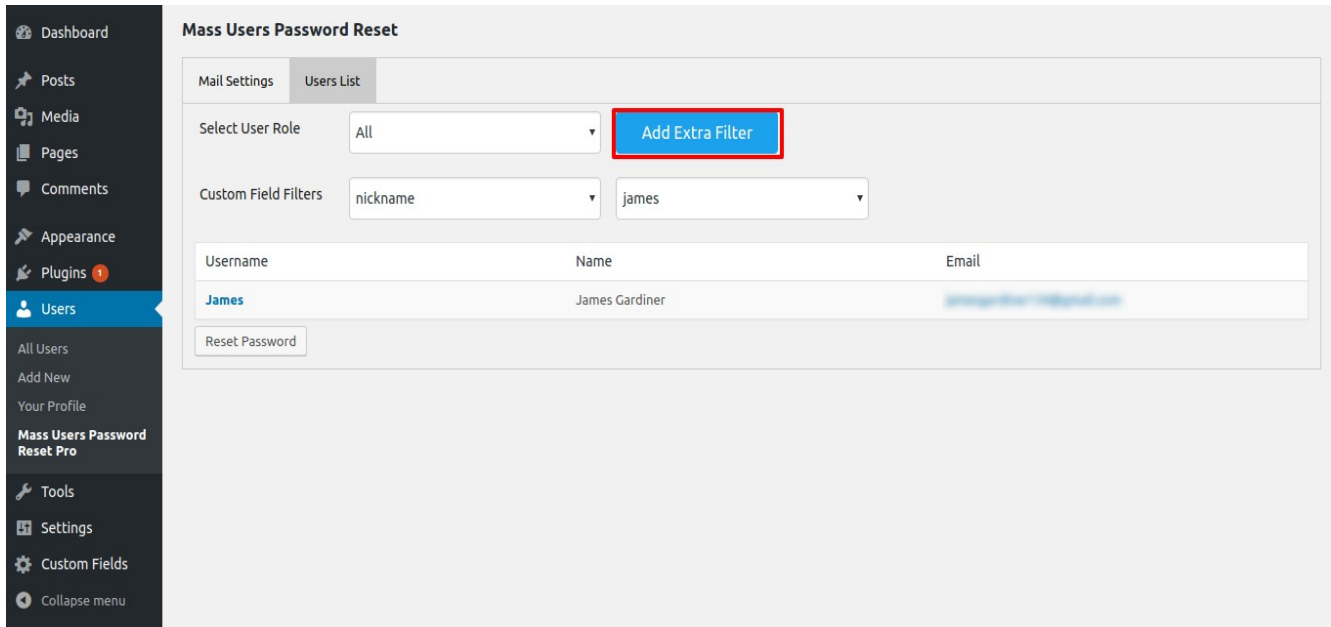

Here you'll see all the users and reset their password by clicking **reset Password** button.

Bifurcation of users by Role

You can reset the password of specific group of users according to their role.

Bifurcation of users by Custom Field

You can filter the users by clicking on "Add Extra Filter" button. Custom field filters will display different user meta keys. Based on selected custom field and selected value you can reset password of specific group of users.

NOTE: Filtration of users will be done either by role or by custom fields.

MASS USERS PASSWORD RESET PRO

Customize Email Template

You can customize the reset password email template and can use the placeholders on right side in Email body for inserting user details. These placeholders won't be used anywhere else except in message body. There will be 2 options for resetting the password.

1) Admin will reset the password of all users and mail containing changed password will be received to them. The length of randomly generated password is 8 characters, but by applying filter 'mupr_password_length' you can customize it.
   For Example: Write this code in function file:

   add_filter('mupr_password_length','my_theme_function');

   function my_theme_function(){

        return 6;

   }

2) User can himself reset password. Reset password link will be mailed to them.

{RESET_PASSWORD_URL} link takes you to default WordPress reset password page while the link in {WOO_RESET_PASSWORD_URL} will take you to WooCommerce reset password page.
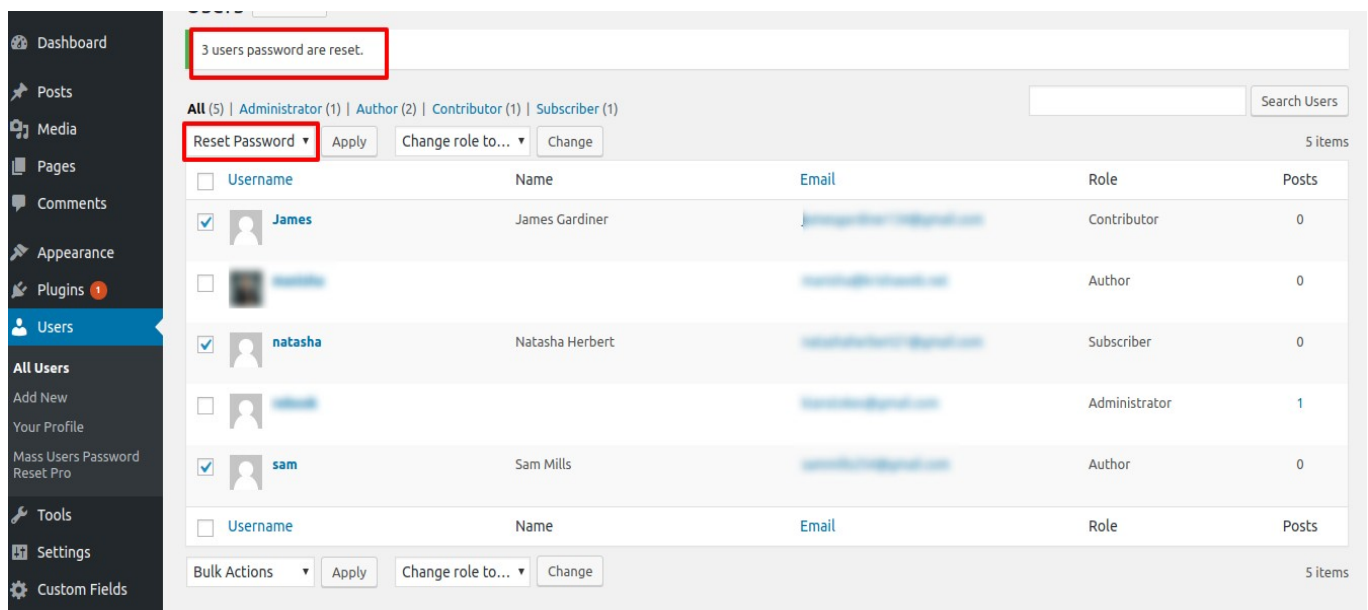

Reset Password of single user in users page

You can reset password of single user from users page also. The message containing

respective user's name will be displayed on success.

Reset Password Bulk action

You can reset password of multiple users without having anything common in them by just check the box of respective user and select Bulk action 'Reset Password'. The message containing the count of selected users will be displayed on success.

Note: Bulk action will only work in WordPress 4.7 or higher version.
